The first Smith & Wesson Gun

Horace Smith

Daniel B. Wesson

The name Smith & Wesson has been synonymous with quality firearms for over 145 years. During these many decades Smith & Wesson has led the industry as the innovator in handgun and cartridge development. Our founders, Horace Smith and Daniel B. Wesson, set the stage for Smith & Wesson's leadership role with the development of the cartridge known today as .22 rimfire.

Other Smith & Wesson milestones are the first American-made large caliber centerfire revolver (Model 3), first revolvers chambered for a Magnum® cartridge (.357 Magnum®), first American-made double action pistol (Model 39), first American-made high capacity pistol (Model 59), first stainless steel handgun (Model 60) and the first light-weight handguns (Chiefs Special Airweight® and M&P Airweight®). Last year, Smith & Wesson introduced the lightest full feature revolver ever made, the Model 317, an innovative small frame .22 caliber handgun that incorporates the latest in metallurgy and manufacturing technologies.

Smith & Wesson, in conjunction with major ammunition manufacturers, has also led the industry with the introduction of cartridges and handguns chambered for the .38 Smith & Wesson Special, .44 Smith & Wesson Special, .357 Magnum®, .41 Magnum®, .44 Magnum®, and .40 S&W. Being responsive to the needs of law enforcement and consumers has always been at the forefront of product and program development at Smith & Wesson.

Today that philosophy is reflected in the Smith & Wesson National Firearms Training Center, a \$3 million expansion of the oldest private firearms training center in the country. This state-of-the-art facility, designed to train both civilians and law enforcement, features an extensive list of training programs, rental range for members, retail store, on-site armorer and a uniquely qualified staff. Our commitment is to train knowledgeable,

responsible and safe firearm owners by providing the best in training and products.

An investment of over \$50 million in the last several years has positioned Smith & Wesson as one of the most modern manufacturing facilities in the industry. Our ability to forge, machine, heat treat, polish and finish metal is unequalled in the history of the company. This versatility offers opportunities, not only for firearms, but in the broader world of manufacturing and metal working for other industries. Today Smith & Wesson provides these services for over 300 companies with products ranging from medical instruments and sporting equipment to auto parts and landscaping tools. The name so long synonymous with the best in firearms is also now associated with many other quality products.

Commitments and accomplishments such as these are the reason Smith & Wesson is known worldwide for quality, service, value and innovation. As we move towards a new century, and Smith & Wesson approaches its sesquicentennial, be assured that the spirit and precepts of our founders will continue to guide.

Smith & Wesson

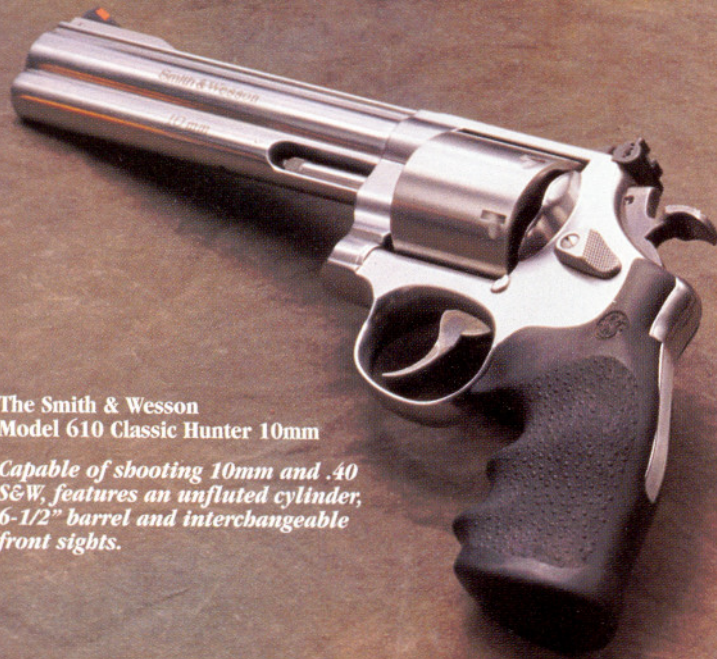

SMITH & WESSON AN AMERICAN TRADITION SINCE 1852

TSW Tactical Series

Smith & Wesson has forged new boundaries in state-of-the-art pistol manufacturing techniques with the all new Tactical Smith & Wesson Series™ (TSW). Designed for law enforcement carry and personal protection, the advanced TSW Series delivers smooth, reliable function, and enhanced accuracy in the tightest production pistols we've ever made.

Focusing on the unique dynamics of tactical firearms, these new autoloading pistols boast a full range of design enhancements executed to exacting tolerances through precision manufacturing.

The line's ultra-tight production is the result of Smith & Wesson's industry-leading commitment to heavy CNC machining rooted in technologies advanced by the S&W Performance Center. The TSW Series brings all these elements to bear through greater shooter controllability and major caliber performance in a lightweight, compact size. All Smith & Wesson firearms are manufactured in accordance with our ISO9001 registered quality system.

Compact and Light-weight

All TSW's utilize a high tensile strength aluminum alloy frame for reduced weight. The hammer tang on single stack models has been shortened for a more compact and snag resistant design.

Double Action-Only Pistols

MODELS 4553TSW-.45 ACP, 4053TSW-.40 S&W caliber, and 3953TSW-9mm caliber feature Double Action-Only triggers. Safety features include a magazine disconnect and out-of-battery disconnect.

Big bore aficionados will find the 6 shot Model 4553-.45 ACP ideal for personal carry situations requiring a truly compact full-featured pistol.

Grips: Straight Backstrap
Weight: 29.0 oz.
Overall Length: 6-7/8"
Height: 5"
Width: 1.05"
Material: Aluminum Alloy/Stainless Steel
Finish: Satin Stainless

Continuous Slide Support

Tighter tolerances translate into less wear and smoother function of a handgun's operating elements. In the Tactical Series, this is most evident in the full length, front to back rails on the stainless steel slide and alloy frame. Added strength

and support and less friction enable the slide to stay true to its proper alignment throughout its cycle, optimizing shooter accuracy, shot after shot.

Delayed Unlock

In a crisis situation, reaction to first shot recoil can cost valuable seconds. To lessen the impact on the shooter's reaction time, the TSW Series offers an extended unlock time. By keeping the barrel locked longer to the slide during the firing sequence, shooters experience less "felt" recoil, enabling them to stay on target and return to firing position faster. All of the Tactical Smith & Wesson Series pistols feature a delayed-unlock firing system.

Design Details

Every facet of the TSW Series has been designed to maximize performance, while decreasing bulk and mass.

This is most visible in the single stack magazine TSW models. The magazine fits flush inside the frame to significantly reduce the gun height.

In traditional double action models, an ambidextrous/ manual safety/decocking lever is offered to accommodate both left and right-handed shooters. All double stack pistols have a reversible magazine release.

Novak three dot sight systems are standard with the Tactical Smith & Wesson Series. Night sights are available as an option.

Traditional Double Action Pistols

Traditional Double Action pistols include the popular law enforcement chambering .40 S&W caliber Model 4013TSW, .45 ACP Model 4513TSW, and 9mm Model 3913TSW.

The Tactical Smith & Wesson Series offers a Lifetime Service Policy, part of the Smith & Wesson Advantage™ you gain with your handgun purchase.

Traditional Double Action

Model 3913TSW

Order No. 104530

Action: Traditional Double Action

Revolvers

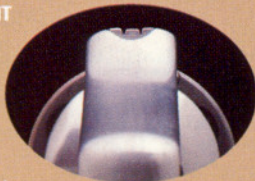

HAMMER BLOCK

A revolver safety feature against unintentional discharge, that will allow the gun to fire only when the trigger is pulled all the way to the rear.

FIXED NOTCH REAR SIGHT

For a carry gun with a smooth draw and quick sight alignment with nothing to get out of adjustment.

GRIPS

Full range of grips available—round or square butt.

Since 1852, Smith & Wesson revolvers have been the standard by which all others are judged. Our experience and attention to detail results in the consistently smooth double action and crisp single action trigger pull that have made Smith & Wesson revolvers famous the world over. An innovative cylinder manufacturing process ensures world-class accuracy shot after shot. Our technologically advanced heat treatment process combined with traditional drop-forged construction yields a lean frame that is extremely strong and highly durable. There are less expensive ways to produce a revolver, but there are none better.

Smith & Wesson offers the widest variety of revolvers to meet every need, from competitive shooting to law enforcement to hunting. Choose from small, medium or large frame sizes and nine barrel lengths in calibers ranging from .22LR to .44 Rem. Magnum®. You also have a choice of blue or stainless finish, front and rear sights, round or square butt grips, target or combat triggers and five hammer styles.

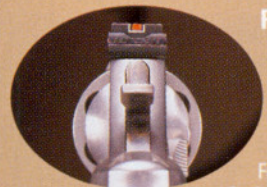

INTERCHANGEABLE FRONT SIGHTS

Nine front sight options on our large Classic revolvers are available for every need and purpose from competitive shooting to hunting and plinking.

REAR SIGHTS

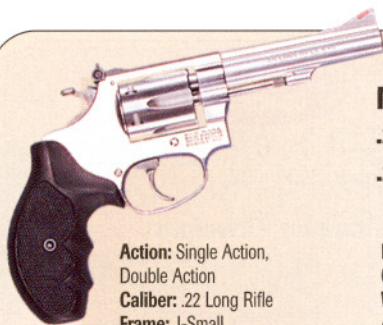

Among the many revolver sight options are the popular Red Ramp Front and White Outline Rear Sights.

DRILLED AND TAPPED FRAMES

All medium and large frame target revolvers are drilled and tapped to accept scope mounts for hunting and competitive shooting.

Pistols

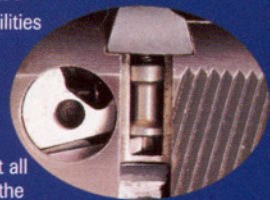

ADJUSTABLE REAR SIGHTS

Smith & Wesson Micrometer Click for windage and elevation.

FIRING PIN SAFETY

Reduces the possibilities of unintentional discharge, even if a pistol is dropped. The mechanism positively locks the firing pin in place at all times except when the trigger is pulled.

FIXED BARREL BUSHING

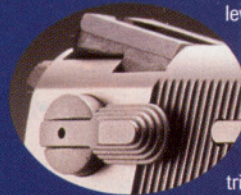

Standard on every Smith & Wesson 3rd Generation pistol for enhanced accuracy.

Smith & Wesson pistols provide the value and performance you demand, delivering superb accuracy, stability and durability. Law enforcement professionals and serious shooters will appreciate the new Tactical Smith & Wesson (TSW) pistols. These precision pistols are packed with features, such as reconfigured rails, tighter lock-up and longer locking delay for greater accuracy. These refinements make the Tactical Smith & Wesson series pistols among the finest production pistols in the world. It's no wonder that Smith & Wesson pistols are the choice of more than 2,000 law enforcement and military agencies worldwide.

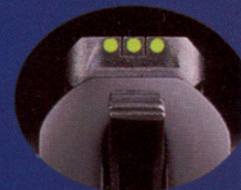

AMBIDEXTROUS SAFETY/DECOCKING LEVER

Slide-mounted safety/decocking lever that can be operated on either side of the slide on selected models. By pushing the lever down, the hammer is safely decocked without engaging the trigger and shields the firing pin from the hammer. The up position puts the pistol in ready-to-fire mode.

TRITIUM NIGHT SIGHTS

Available as an upgrade to standard sights, they help you get a quick, clear sight picture, even in the lowest light.

GRIPS

Wraparound grips are available in curved or straight backstrap styles on most models.

Laser Engraving

AVAILABLE DESIGNS

Owners of Smith & Wesson handguns can select from a series of scroll work, lettering and animal motifs that can be laser applied to their gun. From initials on the slide of the pistol or scroll work on the cylinder of a favorite revolver, to an image of your favorite wildlife on the sideplate of a hunting revolver—there is a laser engraving style and subject to personalize your Smith & Wesson.

LaserSmith engraving is quick and affordable. Your gun will be return shipped within two weeks of being received for engraving. The cost for full coverage work will not exceed \$65.00 and depending on the frame size and amount of coverage may be even less. Laser engraving can be done on any carbon or stainless steel component of your Smith & Wesson handgun. (Small alloy frame revolvers with stainless or carbon steel barrels and cylinders cannot be engraved.) For more information call 1-800-331-0852, ext. 2904.

Customer Service

When you purchase a Smith & Wesson it comes with the experience gained by nearly 150 years of producing the World's most extensive line of handguns. It also comes with an unequalled commitment to each and every customer.

Lifetime Service Policy

There's real peace of mind in knowing that Smith & Wesson will repair any defect in material or workmanship without charge to the original purchaser for as long as you own the gun.

Fast Reliable Customer Service

We invite you to give us a call if you have a problem or question on any Smith & Wesson product. If your Smith & Wesson product has a defect in material or workmanship, call our service department any time between 8:00 am and 5:00 pm coast to coast five days a week at 1-800-331-0852, ext. 2904.

911 Priority Repair Service

In the event of an emergency (repairs needed by law enforcement, an upcoming match or hunting trip), call 1-800-331-0852, Ext. 2904 and ask for 911 Priority Repair Service. This allows you to speak with the Smith & Wesson expert gunsmith who will work on your gun immediately upon receipt. We will return your Smith & Wesson handgun via overnight delivery.

Two (2) Complimentary Factory

Cleaning, Lubrication and Maintenance Checks

Who else offers a complimentary cleaning and check for your handgun? Purchase a new Smith & Wesson handgun, return your warranty card and you will receive two (2) coupons for complimentary factory checkups. Just return your Smith & Wesson to the factory in Springfield, Massachusetts with the coupon for a complimentary cleaning, lubrication and maintenance check. Whether you use a Smith & Wesson handgun for shooting sports, personal protection or hunting – you own more than a revolver or pistol, you also carry the confidence of nearly 150 years of experience. You have the Smith & Wesson Advantage™.

Easy Access Customer Service

We now have four convenient methods to communicate with us:

- World Wide Web: Q&A via www.smith-wesson.com
- Telephone: 1-800-331-0852, Ext. 2904 (8:00 am - 8:00 pm E.S.T., Mon-Fri)
- FAX: 1-413-747-3317
- Postal Mail: Smith & Wesson

Performance Center

Highly specialized pistols and revolvers made by the finest gunmakers for discerning collectors and demanding shooters.

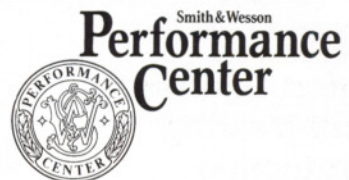

The Smith & Wesson Performance Center delivers the best value in high performance handguns available today. Whether you are looking for a competition revolver or pistol, the perfect carry gun for personal defense or just the right revolver for serious handgun hunting, the Performance Center can meet your needs.

Performance Center handguns are designed and built to meet the highest expectations – those of the demanding shooter. Performance Center pistols features include hand-fit titanium coated barrel bushings and hand-fit slide stops for superior accuracy, hand-throated barrels for smooth feeding and extraction, and polished and honed parts for a smooth, performance-tuned action.

Revolver shooters enjoy the same attention to detail in specially designed barrels with adjustable weights, porting to reduce muzzle jump, adjustable trigger stops, ball detent lock-up and the ultimate in crisp single action and smooth action expected from Smith & Wesson.

The Performance Center also offers gunsmithing services to owners of Smith & Wesson products. Revolver and pistol owners can choose from services including Custom Action Jobs, Mag-na-porting, sight changes, installation of night sights and many other enhancements. Custom barrel installations, single and double action-only conversions and refinishing are also available from the skilled members of the Smith & Wesson Performance Center.

Contact the Smith & Wesson Performance Center for pricing and details of Performance Center products and services.

Bicycles

Two years ago Smith & Wesson began investigating the growth of the bicycle market within Law Enforcement. Bicycles are taking on an increasingly important role within the public safety community as an effective way of patrolling cities and other environments.

However the value of the bike patrol unit goes beyond crime prevention. The bicycle, as an alternative to the police cruiser, breaks down the barriers that separate citizens from police by creating a more approachable, accessible and visible means of security. Bikes are providing a way of putting the community in touch with individual officers and promote a cost effective, healthier approach to Law Enforcement.

The special features and materials used on Smith & Wesson bicycles, to meet the requirements and deliver the performance that officers require on a daily basis, were developed through consultations with over 200 L.E. agencies. Today, at its Springfield, Massachusetts facility, Smith & Wesson is producing the only public safety mountain bike specifically designed for the Law Enforcement market. Each bicycle is hand built from high end components, with the same attention to detail that has made our quality legendary to firearm owners for nearly a century and a half.

Now consumers can benefit from the in-depth research Smith & Wesson conducted in developing the Law Enforcement bicycles. Comprised of an oversized aluminum frame, Shimano LX components, RST Mozo Pro shocks and a comfortable gel seat, this bicycle will deliver the performance and reliability consumers have come to expect from Smith & Wesson. For more information on the best mountain bike choice for a rail and trail application, please call 1-800-331-0852, ext. 2904.

Custom Engraving

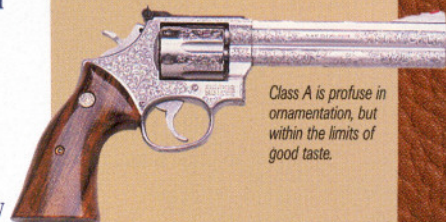

Complex depth and detail can only be achieved through custom engraving. It can be created when specially inlaid with sterling silver and ivory, as in the Dallas Safari Club logo.

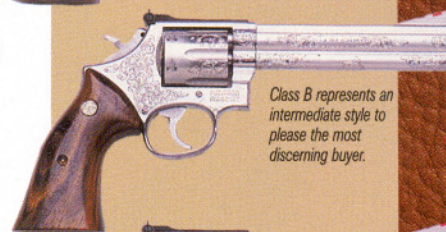

Unique and exclusive, the differential finish on most Smith & Wesson handguns custom engraved in our shop helps to highlight scrollwork, badges, logos and special motifs. Shown here as an example, is a special revolver, Model 15, and a Performance Center Shorty Forty pistol.

Throughout its 145 years, Smith & Wesson has employed the finest metal artisans, leaving a legacy of artwork covering our complete history. Smith & Wesson master engravers have always worked to provide the most striking personalized designs: exciting hunting scenes, replicas of agency seals and shields, emblems and inscriptions, names or initials, even personalized motifs. The Custom Engraving Shop will work with you to develop your own unique design. For more information about custom engraving your Smith & Wesson, call 1-800-331-0852, ext. 2904. For a custom engraving catalog, ext. 293. You may also view engraving on our home page at: www.smith-wesson.com or E-mail Paul Piquette, Master Engraver at: sw@smith-wesson.com.

Class A is profuse in ornamentation, but within the limits of good taste.

Class B represents an intermediate style to please the most discerning buyer.

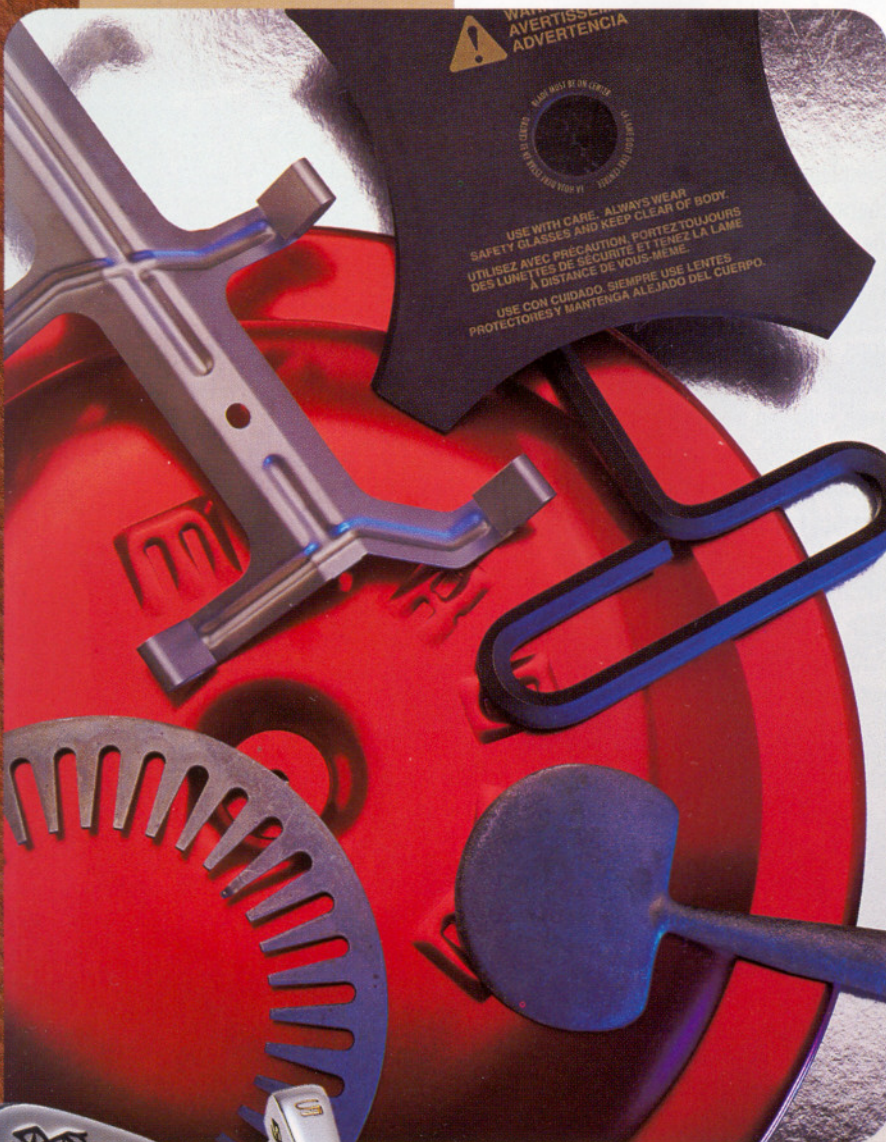

Class C provides ornamentation for all major parts of the gun to a lesser extent than Class A or Class B.

The beautiful elk game scene showcased on the model 629 CL DX below is a fine example of another complex custom engraving technique called Bulino.

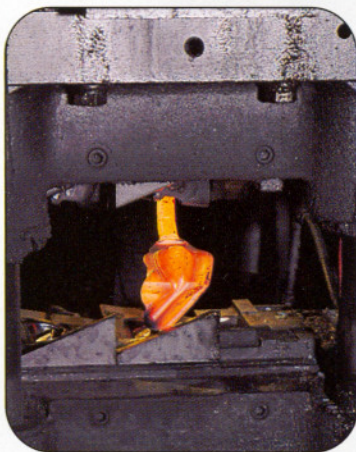

Specialty Services

Since its beginning, Smith & Wesson has been a metal working company. Over the decades our ability to forge, cut, drill and shape the metal components of our products has changed with the tools and technologies that have emerged. Today Smith & Wesson is one of the most modern manufacturing facilities in the world when it comes to metal production processes.

Specialty Services now offers these processes and services to other industries, with over 300 companies currently using the unique capabilities found at Smith & Wesson. Among the services offered are Heat Treating, Plating and Metal Finishing, Forging and Pressing, CNC Machining, Milling and Cutting Tool Manufacturing and Regrinding. All customers receive the same high quality workmanship that has made Smith & Wesson a world leader in the handgun business.

For more information call
1-800-331-0852, ext. 2904.

Training Academy

THE NEW SMITH & WESSON ACADEMY AND NATIONAL FIREARMS TRAINING CENTER

The New Smith & Wesson Academy & National Firearms Training Center offers multiple indoor ranges, classrooms and support facilities.

Formerly open exclusively to law enforcement professionals, the new Smith & Wesson Academy and National Firearms Training Center is a multi-million dollar state-of-the-art firearms training facility located in Springfield, Massachusetts. The new Smith & Wesson Academy and National Firearms Training Center features both private and public ranges, multi-media classrooms, and a retail store.

Professional Staff

With over twenty-seven years of continuous, dedicated service and the benefit of a full-time staff of experienced law enforcement, military, security, and other professionals, we can offer you up-to-date, effective and realistic training.

Course Selection

Our courses build the level of confidence and skill needed to effectively and decisively defend yourself as well as to operate a firearm safely for personal and recreational use. Course offerings include Introduction to Defensive Firearms, Dynamics of Personal Protection, Concealed Carry Handgun, Defensive Handgun Tactics and Techniques, Defensive Aerosol Use, Sexual Harassment and Rape Prevention, and Firearms Safety, Cleaning, and Maintenance.

Public Shooting

Shooting range lanes are available to the public for personal self-improvement and recreational shooting. There is a selection of Smith & Wesson firearms, ammunition, targets, and other rental items available, if needed.

Smith & Wesson Academy Store

The academy features an offering of firearm related merchandise that have proven value and provide the best support for quality performance. The Store also displays the entire Smith & Wesson line of firearms and accessories. The Store staff and management are all experienced and instructor qualified in order to assist you while at the Academy.

Museum

A Smith & Wesson museum of firearms and special historical exhibits is located on-site. The museum focuses on the development of the firearm and the critical role that the Connecticut Valley firearms industry has had in design and manufacture in America.

Law Enforcement

The Smith & Wesson Academy has developed a challenging program for 1998 and has expanded its course offerings to meet the changing needs of the law enforcement or security professional. Dynamic new courses focus on a wide range of shooting skills and emphasize both individual and team tactics. The current curriculum offers a variety of sessions including courses covering the major instruction blocks of Handgun Training, Instructor Development, Rifle Training, Tactical Training, Defensive Techniques, Specialized Courses and Armorer's School.

To Register

The Smith & Wesson Academy offers a unique opportunity to share in the knowledge gained through considerable international training experience. The results are courses that incorporate the latest techniques and concepts. These courses offer high quality, up-to-date instruction designed to enhance the skills of security and professional law enforcement officers.

Smith & Wesson Public Safety Technologies

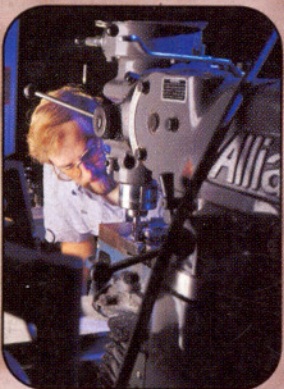

PD2000 is a comprehensive software bundle designed to assist with routine police activities. Increase an officer's productivity through improved efficiency by incorporating powerful, easy to use software in an integrated suite. Within PD2000 are three individual suites called PDAAdministrator (PDA), PDInvestigator (PDI) and PDTrainer, each containing a number of applications directly related to that aspect of police business.

PDA includes Private Duty Jobs for administering and billing private or off duty assignments, Evidence Manager for recordings and tracking seized material and Personnel Administrator to assist with personnel records management.

PDI includes Identi-Kit 2000 for creating facial composites, Search Warrant for preparing and tracking search warrants, Arrest Warrant for preparing and tracking arrest warrants, Statement Taker for preparing sworn, written statements and Internal Affairs Manager for tracking internal affairs complaints and investigations.

PDT includes Field Training Officer (FTO) for tracking individual police officer's training records and future/upcoming requirements, P.O.S.T. Training for managing all P.O.S.T. requirements and Firearms Manager for tracking weapons maintenance and service histories and training utilization.

PD2000 will benefit law enforcement departments by saving time to prepare reports and improve the effectiveness and accuracy of routine police activities.
